REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-10 are allowed because none of the prior art teaches or suggests the particular subset of the steps of a substrate for a reflection type liquid crystal display element wherein either or both of the first transparent films and the second transparent films are arranged such that a film thickness thereof increases progressively or decreases progressively with distance from the transparent substrate, and a difference between maximum and minimum values of light reflectance is not more than about 10% at wavelengths corresponding to each of red, green, and blue components of visible light so that the reflective mirror is substantially free of ripples in an optical reflection spectrum or optical transmission spectrum across a visible region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
